

**For CHRISTMAS, Chenonceau  
is vowing for a more beautiful world  
with its floral arrangements  
portraying the colours of peace**

The château of Chenonceau, has for the last thirty years been a strong representative of Art in all its forms, and as recently as this summer housed part of Unesco's collections offering a contemporary testimony of its humanist commitment. An exceptional site is what Chenonceau has become through its destiny; built, loved, governed and protected by women who have marked History. This feminine imprint is present everywhere, safeguarding the château from conflicts and wars, making it a haven of peace and serenity.

**And Chenonceau wishes to share this commitment for peace with all its visitors from the whole world over coming especially for the Christmas celebrations.**

From 8th December to 3rd January, Chenonceau will be radiant in white and gold: Doves, angels, fir trees, bouquets, symbols and messages of peace in all languages will turn the « Ladies' Château » into an emblem of harmony.

Chenonceau places gentleness and beauty at the heart of its universal message of peace, to remain the château of noble minds it has always been.

**The musical quartet 'Quatuor Thélème' will be present for the week-ends of 19th and 26th December, as well as for the week-end of 2nd January, from 1.30 p.m. to 4.30 p.m., to accompany visitors with traditional Christmas carols.**
